

Way of Life!

## Convenient Features

**Adjustable Brake Lever**  
Easily adjustable 5-way brake lever.

**Center Stand / Side stand**  
A center stand is mounted as standard equipment to ensure easy servicing for tasks such as drive-chain adjustments and rear tire changes. A side stand switch also prevents engine ignition, while the side stand is down.

## Specifications

Solid Police White (YNZ)

|                    |   |
|--------------------|---|
| Overall length     | 2,240 mm                                  |
| Overall width      | 920 mm                                    |
| Overall height     | 1,325 mm                                  |
| Wheelbase          | 1,430 mm                                  |
| Ground clearance   | 150 mm                                    |
| Seat height        | 780 mm                                    |
| Curb mass          | 213 kg                                    |
| Engine type        | 4-stroke, 2-cylinder, liquid-cooled, SOHC |
| Bore x Stroke      | 53.5 mm x 55.2 mm                         |
| Displacement       | 248 cm <sup>3</sup>                       |
| Compression ratio  | 11.5 : 1                                  |
| Fuel system        | Fuel injection                            |

# GW250JP

Police Edition

## Product Information

## Law Enforcement Equipment

### 1 All-in-One Front Patrol Light

Front patrol light and siren have an all-in-one style that is both simple and appealing. Eye-catching patrol light and a penetrating siren have a warning effect. Patrol lights come in any of the following 3 versions to match law enforcement specifications in different countries.

GW250JP1 : red on right and blue on left  
GW250JP2 : red on both sides  
GW250JP3 : blue on both sides

### 2 Handlebar Switches

Special handlebar switches on the Police Model control the patrol lights and sirens.

### 3 LED Flat Rear Patrol Lights

The LED flat rear patrol lights are mounted under the top case and provide great penetrating power along with a long service life. These are highly visible even under poor weather conditions to give an excellent display effect.

### 4 Professionally Designed Cases

The top and side cases are designed to offer a total volume of 58 liters (21 liters on top; 18.5 liters on right; 18.5 liters on left). These are waterproof and provide large storage space. Top case cover comes with a specially designed note pad and lamp for filling out police paperwork in dark locations where there isn't much light.

\*Maximum loading capacity is 1.5 kg for top case and 3 kg each for side cases.

### 5 Front Bumpers

The front bumpers are mounted on both sides of the frame.

## Instrument Cluster

All lights and indicators are illuminated in the photo for illustrative purposes.

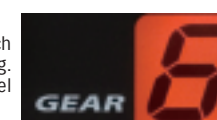

### 9 Multi-function Instrument Cluster

The multi-function instrument cluster displays a variety of useful information. A large analog tachometer with an attractive eye-pleasing display is located in the center of the panel with a handy gear position indicator. Also included are a digital LCD speedometer with odometer, double trip meter, clock and fuel gauge readout, engine RPM indicator and maintenance interval indicator.

\*The select button sequentially selects the odometer, twin trip meter, and clock.

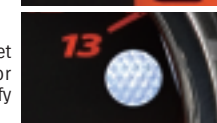

### Gear Position Indicator

Gear position indicator shows which gear the rider is currently using. This indicator helps the rider feel confident.

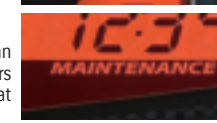

### Engine RPM Indicator

When engine RPM reaches a preset figure the engine RPM indicator lights up or starts flashing to notify the rider shift up to a higher gear.

### Maintenance Interval Indicator

Notifies the rider that it is time for an engine oil change. This display appears at the first 1,000 kilometers and at every 6,000 kilometers thereafter.

## Engine

### 10 248 cm<sup>3</sup> In-line Two-cylinder Design

Delivers a full range of power from idling to patrol work and gives a swift reaction when acceleration is needed. A coupling-type balancer shaft fitted to the engine crankshaft reduces engine vibration and enhances riding comfort.

### 11 Fuel Delivery

The fuel injection system electronically controls the fuel and air mixture to an optimum level that matches riding conditions based on the various sensors to improve fuel economy and low emission. This also contributes to stable idling and linear throttle response.

### 12 6-Speed Transmission

The six-speed transmission delivers good acceleration and cruising performance along with the long stroke engine.

### 13 Liquid-cooled Technology

Liquid-cooled technology helps to keep the engine from overheating whether just idling during long-term parking or working at high revs. This makes the motorcycle ideal for daily patrol riding.

## Comfort

— GW250JP — GW250

### 6 Upright Riding Position

The upright riding position with high-positioned handle bar is designed for city patrol to ensure the police officer will feel comfortable, ever after, long rides.

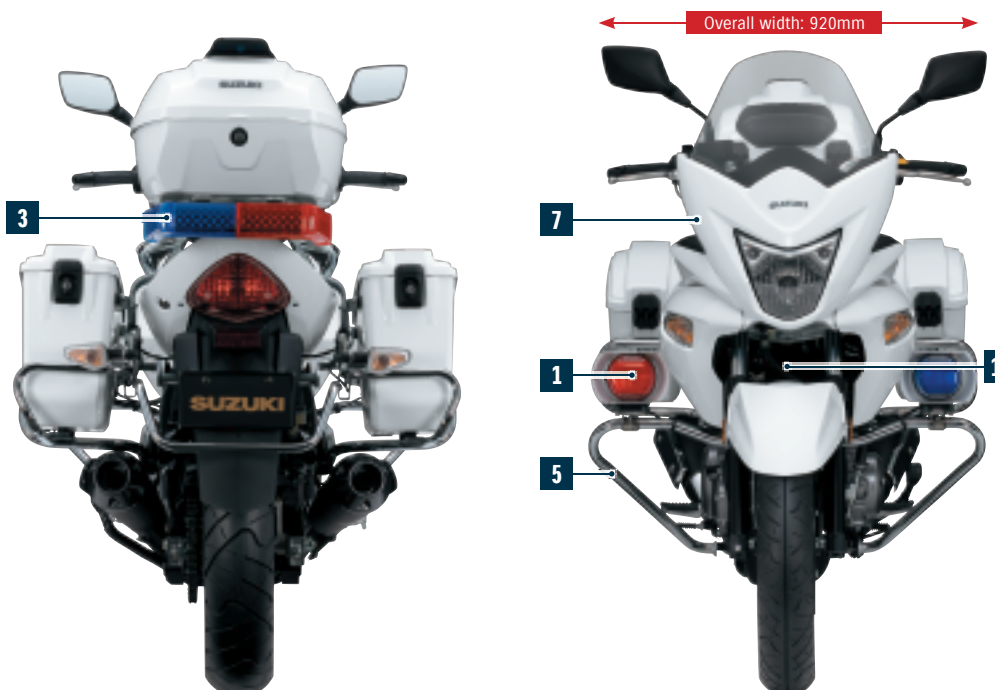

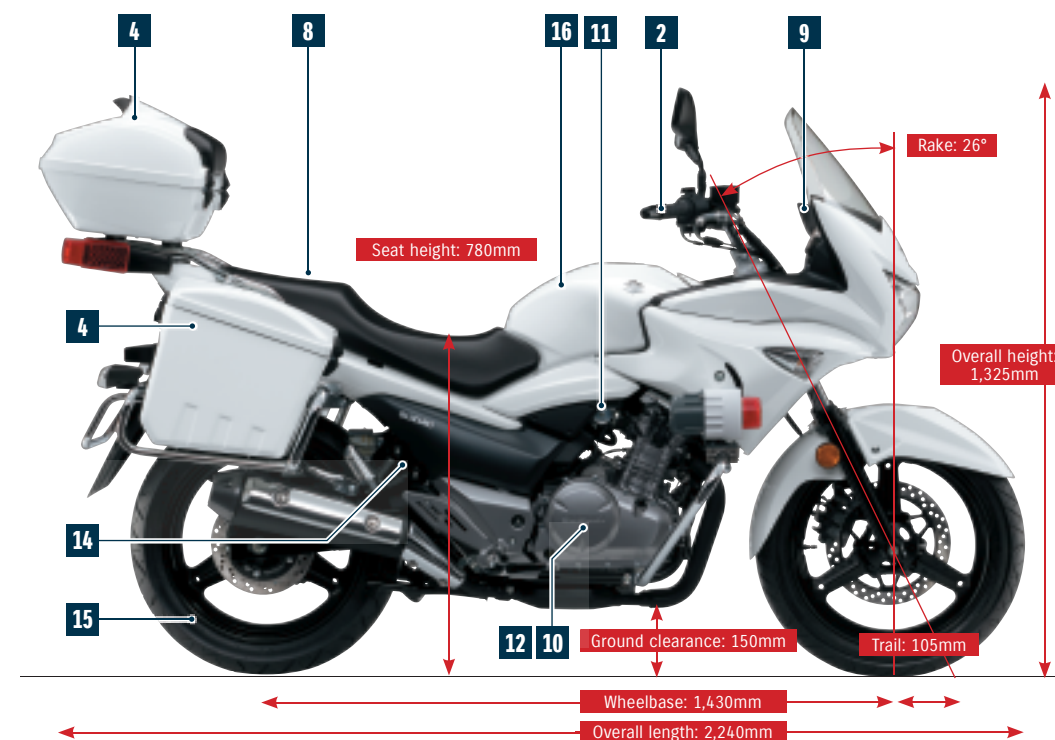

### 7 Integrated Cowling

The half fairing and windscreen perfectly combine sharp design lines with aerodynamics to lower wind resistance and rider fatigue.

### 8 Contoured Seat

The sleekly attractive seat rises from the contours of the fuel tank. The rider's seat at a low height of 780mm gives a comfortable and maneuverable riding position.

## Chassis

### 14 Rear Mono Suspension with Spring Preload Adjuster

The rear mono suspension contributes to good maneuverability with its light weight and mass distribution compared to conventional twin-type suspensions. The rear mono suspension comes with a 7-way spring preload adjuster to match road conditions with rider preferences.

### 15 Front and Rear Disc Brake System & 17-inch Tubeless Tires

The hydraulic front and rear disc brakes provide consistent and controlled braking sturdy 17 inch tires provide superb road grip over a wide range of road conditions.

**16 Fuel Tank** The 13.3-liter fuel tank is ideal for long range riding and shaped to provide confident yet comfortable seating.
